

Application Portfolio Rationalization

Information Technology is increasingly being used to meet new challenges in the healthcare industry brought on by consumer demand. Maintaining an accurate inventory of IT systems and software along with the associated costs of maintenance, upgrades, licensure, functionality and other attributes is a daunting task. MMY's Application Portfolio Rationalization system is designed to provide clients with an efficient way to manage their entire application portfolio assisting with controlling operating expenses, reduction of workflow conflicts, and managing technical complexity.

Capabilities

- Data Collection and Analysis
- Application Placemat
- Data Archiving and Migration Strategy
- Rationalization Strategy for sunseting
- Fully functioning tool designed to assist the customer with management of an ongoing application rationalization program

Benefits

The ability to understand the application landscape allows organizations to pinpoint needs and requirements for the following;

- Budgeting
- Support
- Licensing
- Prioritization
- Staffing

We've Done IT Before

The MMY team has led multiple successful application rationalization projects for clients. Customers have saved tangible dollars in the form of reduced software licensing fees, better allocation of personnel resources, and reduction in hardware costs.
