

Configuration, Testing, Interfacing, and Training

Many of today's health systems are implementing new EHRs or ERP systems as well as other software that makes up the complete suite of offerings. Whether it is a new install or changes to an existing family of products, the ability to deliver a successful outcome depends on making sure the heavy lifting is completed in the most efficient way.

MMY's ability to deliver world-class service in the EHR/ ERP has been demonstrated on multiple occasions with many clients. In today's rush to improve productivity many timelines get scrunched to meet a deadline. We can help you deliver on time within your budget to keep those timelines in place with successful outcomes. The focus tends to be on the new bells and whistles if the testing, interfacing, and training become secondary the true benefit of the effort will not be realized. Being able to implement a complete program or simply supplement your staff, MMY brings proven methodologies and template to each engagement.

Capabilities

- Configuration of your EHR /ERP and or ancillary systems. We have worked with all of the major vendors and have senior resources ready to work with you.
- Complete Training Plan development as well as certified training resources.
- Integration experts can deliver using many of the most popular interface engines (i.e. Core Point, Ensemble, eGate, OPENLink, Cloverleaf, etc.)
- Development of your testing plans using proven methodologies as well as testing resources.

Benefits

By allowing a proven partner to assist you, the burden is relieved from your staff. We have a great deal of experience weather with supplying supplemental resources or developing the complete program.

We've Done IT Before

MMY has assisted several major clients with the conversion of their data including manual (from paper charts to Allscripts), legacy system data (Allscripts to Epic), and more. Visit mmyconsulting.com to engage with an experienced staff member and learn how this valuable service can help you quickly and effectively transfer patient data.
