

Infrastructure Design

Is your healthcare organization expanding into a new facility, renovating an existing building, or considering a technology upgrade? We have deep expertise in planning and implementing IT infrastructure beginning at facility design and working through the construction and commissioning phases of a project. MMY works closely with client stakeholders, architects, builders, contractors, and your information technology organization to achieve infrastructure delivery that meets your technology strategy objectives.

Capabilities

- IT infrastructure needs assessment and planning
- Vendor selection and management
- Wireless network analysis and planning
- Technology planning to match workflow requirements
- Mobile device strategy development
- Development of workstation environments
- Low voltage design review and validation
- Systems interoperability planning
- Implementation project planning

Benefits

We have the experience and have developed best practices to help your organization with successful infrastructure planning. You can expect the following;

- Skilled program leadership
- Infrastructure master plan development
- Creation of the IT project governance structure

We've Done IT Before

MMY understands the importance of a stable and reliable technology infrastructure in delivering quality patient care. We can manage the entire project from start to finish to ensure all solutions are deployed according to plan and budget.
